A 1-door under-bar glass chiller designed to keep your bar glasses cool and easily accessible to service staff in busy bars, clubs, and hotels. With a sleek aesthetic, including frameless glass doors, you can create an integrated look for all undercounter glass door bar refrigeration alongside SKOPE's BackBar range. The body is made from powder-coated, galvanised steel with colour options; it can also be upgraded to full stainless steel construction. The cabinet features wire shelving that can accommodate glass racks at either 355 mm × 430 mm, or 430 mm × 430 mm, for keeping your glasses chilled. The glass doors are designed for condensation protection in standard operating environments via the double-glazed, argon-filled, low-e, insulated panels. The glass chiller uses R290 natural refrigerant for ultra-low energy consumption, low heat discharge and low noise output, with a remote version also available. The slim side-mounted and front-breathing refrigeration system wastes the absolute minimum of your precious floor space, while the fully removable refrigeration cartridge can be removed in line with best practice for safe servicing of flammable refrigerants. The fridge is certified to all Australian and New Zealand refrigeration and electrical safety standards.
